Mission Statement

The Wine Education Council is a non-profit, educational organization that promotes the development and effectiveness of wine professionals through formal study, post-graduate training, and advanced, enrichment opportunities. Our diverse activities include the support of wine programs at institutions of higher learning, the sponsorship of specialized seminars, grants to assist publication of academic works, and the promotion of educational experiences that help students and wine professionals learn about and engage in various sectors of the wine community.

Recognizing that the consumption of wine is vulnerable to abuse, we are committed to providing resources and supporting programs that promote moderate and responsible alcohol use and guard against social problems associated with inappropriate consumption.

As an environmentally and socially conscious organization, we are sensitive to the human and economic impact of wine on our community and remain dedicated to promoting within the global wine community the responsible use of the earth's resources and the implementation of mechanisms that promote economic justice.
